Subject: Call from Emily LoDolce (AMEC E&I)

Emily LoDolce with AMEC E&I called me thanking me for my response to her e-mail of 16 September 2011. She then asked about the compatibility of ESPAM recharge tools. I told her that the ESPAM1.1 tools worked with ARC8.X and ARC9.X, and the ESPAM2.0 tools worked with ARC10.X, there is no upward or downward compatibility. We have a computer with ARC9.3 that will run the ESPAM1.1 recharge tools.

Emily then asked about the trim lines for ESPAM1.1. I told her that the steady state response functions were posted on the SeaPac/Jones call web page.

Emily then asked me to send her a link to the SeaPac/Jones web page.
